Educational play & development products
for nurseries and preschools

Rolf.
education

Welcome to our world of learning and playing

Rolf Education

We design and create products that stimulate children's development, knowledge and skills and support teachers' goals. We work closely with teachers and educational experts to create our Dutch-designed products.

Our mission

We inspire and support people who help children to discover and develop their talents. We feel it's our responsibility to contribute to the growth and development of children aged 0 – 12 years in an environment in which they can get an opportunity to discover and achieve their full potential.

Our fixed set of principles

Design to learn

Do I really learn from this product?

Show the fun

Is it super fun to play with?

Easy to use

Can you easily understand how it works?

Recognizable

Is the product original, distinctive and recognizable?

Special touch

Is there good cohesion within the material?

Power play

Is the product built to last and sustainably produced?

Made in Holland

Dutch designed with love for education

All our products carry the world famous Rolf logo and can be recognized by the robust materials, the vivid colours and the special drawings.

Rolf products are manufactured in the Netherlands and are tested in accordance with European legislation.

This guarantees high quality and safe, durable materials for endless play.

Quality & Safety first

Our materials meet with all standards on quality, durability and, of course, safety! For the production of our wooden puzzles we use the latest technology, which results in beautifully printed coloured images. Prints made of colorants and dyes that all have been CE tested and certified.

All products are tested and approved in accordance with European legislation:
EN71-1: 2014 + A1: 2018 Safety of toys: Part 1: Mechanical and physical properties

EN71-2: 2011 + A1: 2014 Safety of toys: Part 2: Flammability

EN71-3: 2019 Safety of toys: Part 3:

Migration of certain elements
If applicable, the same counts for CPSIA approval for the US.

learning goals

Rolf products offer a complete range of building blocks for the child's brain. Every product will bring certain skills to a higher level. Whether it's math, language, creative or motor skills. Whether it's math, language or physical development, a child will develop its own knowledge and skills while playing with a Rolf product. Furthermore children will become aware of their own identities and develop (self)confidence.

The icons in the top corner of the pages, with the Rolf products, show you which area of development is stimulated.

Every Rolf product is tested extensively by the real professionals

Releasing a new Rolf product is the result of close collaboration between experts in many different areas. Teachers, educational experts, psychologists, illustrators, designers and manufacturers all work closely together to meet the needs of children and teachers.

Product innovation

Because we have a special Rolf product development team, we can quickly respond to current developments in early childhood and primary education. This guarantees you a modern Rolf product range.

Corporate social responsibility

Rolf Education takes its responsibility to society very seriously. When choosing materials, the way the products have been made is taken into account. In addition, we guarantee that the environment is secure in the logistic process as well. We ensure a correct balance within the cornerstones: People, Planet and Profit.

Imagebank

Download product images for use in your own catalogue, brochures, webshop or for social media. The ImageBank is continually updated. Request your personal login code by sending an e-mail to export@rolfeducation.com

Let's be in touch Share your thoughts

Your feedback is most welcome in creating that very special educational experience we all like to offer our kids! We would love to hear your ideas. Also if you have any question or are looking for advice: don't hesitate to contact us!

On the spot

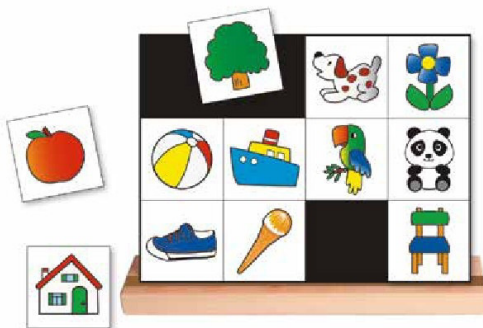

One child takes a task card and gives spoken information to the other child about the objects and their place in relation to each other. The other child places the cards with objects in accordance with the instruction given. The development of mathematical language and concepts as next to, above, on top, down etc. will be practiced. Check the cards when placed to see if the assignment has been made correctly. Change roles and/or take a new card.

Puzzle series Seasons

Magical puzzles that let children's play go beyond the horizontal. These puzzles are designed to improve the vocabulary of children. It is more than just copying an image. The 12 puzzle pieces each have an object depicted. You can make the puzzle by oral instruction, e.g. 'take the lam' and put in on the right spot of the puzzle. When you combine all four puzzles on the big magnetic board in the classroom the task becomes even more exciting. Not only naming the objects but also knowing where they belong in the seasons! Together the four puzzles show a beautiful scene of the four seasons.

My language buddy

1

One of the more significant changes to the school population in recent years has been the increase in the number of children with the language of the country they are living in as an additional language. Until they have got very basic language, they can't really integrate into the class. Imagine you being a young child, in a classroom where everybody speaks a language you don't understand. You must feel as living on an island. To help you to achieve the new language and feel safe in your new world, we developed 'My language buddy'. A combination of the Rolf language cards and the 'Recordable Talking Wall Chart'. The pictures on the cards are based on the primary vocabulary (based upon the Maslow's hierarchy of needs) children need in the first instance to develop their communication skills and self-reliance.

2

Recordable wall chart

This talking wall chart (65 x 53 cm) can be used in combination with 'My language buddy (299.6003)'. Place the cards inside the 30 pockets and record a message to each one. Easy to use for children and teachers. The recordings are made by simply pressing the green button by the pocket and recording into the black box at the top. A simple switch moving from record to play, will then enable you to play back the message by pressing the green button again.

Food for you

Pre-school children see all that delicious food in the supermarkets but where does it actually come from? How and where does all that delicious food grow? This game gets children thinking about the various origins of our food. They have to answer questions such as: 'How does it grow?' Does it grow on a tree, in the ground or on a bush? Does it come from an animal or have people made it and does it come out of a factory? Make the right choices and become the winner of the game!

Action bingo

Bingo really is a game for young and old, and a game you can play together with your class mates. Not only can you play the familiar and straightforward version, you can also play the version that is most fun! In this version, the game master takes one picture card, and the players have to guess what is on the card by asking clever questions. The pictures are divided into categories: transportation, living, clothing, nature, animals and furniture. Therefore, you first have to ask about the category: "Is it an animal?" and then about specific characteristics such as "Can it fly? Does it have a beak? Is it a bird?"

Back chat

Back chat stimulates visualisation skills and develops tactile perception. It also helps children put words to directions, shapes and spatial relationships. The objective of this game is to identify the visual picture that someone draws on your back.

What you feel is turned into an image in your mind and you can draw the image on paper, describe it or select it among other images. The set consists of 4 series of 10 cards with different assignments. Each series has a colour code to make sorting the cards easier. Two children choose the same series of cards and sit or stand behind one another. The child at the back chooses a card from the series and draws the shape on the back of the first child with a finger or a stick. The child in the front looks for the card with the picture of what he or she felt and shows it to the other child. They check to see if it's correct and then make another drawing. The manual describes many other playing variations.

Game of emotions

The game lowers the barriers on talking about feelings. The children learn to express their own emotions, they learn to be open to the emotions of other children and learn to respect these emotions. They learn to give and receive compliments. To express the various emotions, the children can use different styles of expression such as drawing, rhythm and music, body expression and just talking about things that happened. The game is played with one counter. Throw the dice in turn and take a card that matches the face on which the counter lands. Give the card to one of the other players. The person receiving the card is invited to express his particular emotion and responds to the card as indicated by the assignment on the other side.

Wake up your senses

Combining senses and emotions. Children not only discover what senses are and what information they give us. While playing, they find out that not everyone experiences a smell or taste likewise. What picture belongs to what sense. And do you like it? Or what is 'nice' to eat? And what is not?

ROLF BASICS – WAKE UP YOUR SENSES

- Content:**
- cardboard box 255 x 255 x 65 mm
 - 5 cardboard sense cards 5 x 7 cm
 - 40 cardboard object cards 5 x 5 cm
 - 6 cardboard emotion 'scorecards'
 - 50 coloured plastic chips
 - manual
- Artnr. 299.5010**

Where does it come from?

Have the children take a close look at the end product and ask the question: 'Where does our cheese and milk come from?' The children sort the loose cards with each end product and then try to put them in the right order. To introduce this activity and with the focus on the senses it would be absolutely perfect if you could show the children some dried tea leaves, or let them smell a coffee bean or let them touch unspun wool.

1. ROLF ORIGINALS – WHERE DOES IT COME FROM?

- Content:**

Puzzle Know what you are eating

The 'Know what you are eating' puzzle teaches children about healthy food, what you should eat on a daily basis and in which ratio. The pyramid-shaped puzzle is divided into seven rows. The largest part of the puzzle (the bottom row) is about exercise. This is most important. The top row consists of sweets. These are not necessary for a balanced diet and therefore have the smallest section. In between are other groups of foodstuffs that provide very important building materials for a healthy body. By using this material actively, children begin to understand the importance of healthy food and learn its various uses.

ROLF PUZZLE – KNOW WHAT YOU ARE EATING

Day rhythm

Hang or place the activity cards at a height that is clearly visible and manageable for children. The first coloured card indicates the activity to start with. The following cards show the activities that will follow during the day. As soon as an activity is completed, the card is turned over so that the activity becomes visible in shades of grey. In this way the children can immediately see which activities have been completed and which activities will follow. At the end of the day all cards are turn over and together with the children you can evaluate the day.

Numbers set

Didactic set contains educational material that encourages children to count, read and write numbers up to 10. Children can count wooden round tokens, add and subtract them, learn about the relations between numbers (equal, smaller, larger), pair a group of tokens with the appropriate number. A child COUNTS. Children can hold the numbers made of solid wood in their hands and feel the shape of it, try to draw the number with their finger or find the same number in a bag by feeling. Numbers are to be sorted from 0-10. The equal amount of tokens can be placed next to the number. Children get to know the previous and the next numbers by covering or removing numbers in a row. A child NAMES the numbers. Panels with engraved numbers are intended for graphomotoric exercises and getting to know and learn the correct number form. Panels can be placed in line from 0-10. Cover one number (turn or take away). Which number is missing? The difficulty is adjusted according to the abilities of the individual. A child WRITES numbers.

NUMBER SET IN WOODEN BOX

Content:

- 60 wooden tokens
- Numbers made from solid wood 0-9 (2 × 0; 2 × 1; 1 × 2, 3, 4, 5, 6, 7, 8, 9), size 8 cm
- Panels with engraved numbers 0-9 (12 × 16 cm)

What's missing?

These 3 different games develop memory skills. In each game the players have to find out what is missing.

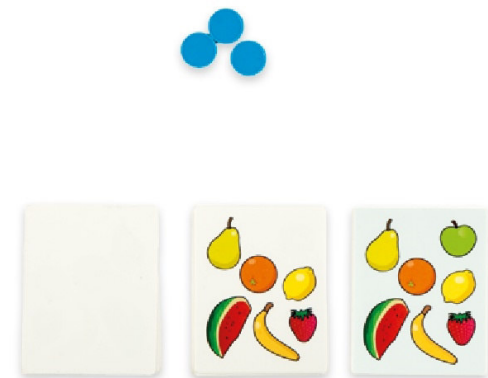

- Which shape has gone: visual discrimination and naming of geometrical shapes
- Which fruit has gone: naming 7 different fruits and trying to remember them
- Which number has gone: exercising the number row up to 5

ROLF ORIGINALS - WHAT'S MISSING?

Content:

- 24 cards for 'Which fruit has gone?'
- 24 cards for 'Which shape has gone?'
- 24 cards for 'Which number has gone?'
- 30 blue, 30 red and 30 orange counters
- manual

Art.nr. 230.3636

Which fruit has gone?

Which of the seven fruits had disappeared? If you've got a good memory and you can respond fast you might be the first to get the answer and win a lot of points. Memory skills and language development are the key elements in this game. Place the cards on a pile on the table. In turns the players turn a card over. Be the first to name what is missing and receive a counter for every correct answer. The player with the most points at the end of the game is the winner.

ROLF BASICS - WHICH FRUIT HAS GONE?

Content:

- 20 cardboard cards
- 95 x 75 mm
- 4 cardboard example cards
- 95 x 75 mm
- 30 blue counters
- manual

Art.nr. 299.5026

Animal count

3 different math games:

- Five little pandas: combine pandas to the quantity of 5'
- Cats or mice: compare the quantities of the cats with the quantities of the mice and see where is more of.
- Each bird an egg: this game is about the one to one correspondence, recognizing equal quantities.

ROLF BASICS - CATS OR MICE

Content:

- 24 cards for 'Five little pandas'
 - 24 cards for 'Cats or mice'
 - 24 cards for 'Birds and eggs'
 - 30 green, 15 black and 15 white counters
 - manual
- Art.nr. 299.5025

Five little pandas

Play strategically and learn to count so that you can get many five little pandas. By turns the players put a card on the table. If the pandas on both cards together form five pandas then the player wins a counter. If there are more or less than five pandas together then it is the turn of the next player to place a card in the middle. This player can choose on which pile to place the card. That way the player is encouraged to think strategically and increases his chance of scoring five pandas. The player with the most counters at the end of the game is the winner.

ROLF BASICS - FIVE LITTLE PANDAS

Content:

- 24 cardboard cards 95 x 75 mm
 - 30 green counters
 - manual
- Art.nr. 299.5024

Cats or mice

Choose cats or mice and count whether there are more cats than mice or more mice than cats! This game enables children to visually see whether there are more cats or more mice. Place the cards on the table in a pile. One player chooses 'cats or mice' the other player turns over the top card. If the player chose cats and there are more cats than mice, that player wins a counter. If there are less cats than mice the other player wins a counter. The player with the most counters at the end of the game is the winner.

ROLF BASICS - CATS OR MICE

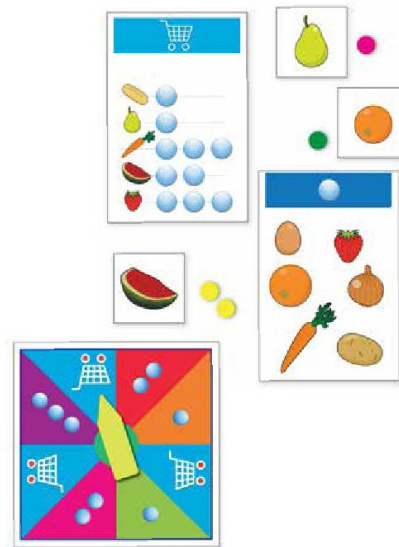

Content:
 - 24 cardboard cards 95 x 75 mm
 - 15 black and 15 white counters

Through the forest

Sword and Shield

The fair maiden's dance

1

2

Knight's empire

Knight's empire has 3 continuous games which help to develop the understanding of amounts and numbers. The common theme in these games is about the knights who are on their way to the fair maiden's ball. In the first game 'Through the forest, the knights collect euros with which to buy their kit in the second game called 'Sword and Shield'. In the third game 'Dancing with the fair maiden', they have to search for 4 objects to take to the ball. The first game, which relates to the concept of more and less, can be presented at the start of the school year. While the children gain counting skills, the other games can also be offered. The games vary in degree of difficulty. The games and theme are exciting and appeal to children. This means that they will be motivated to play the games often. Can be used remedially for children who do not yet have any proper knowledge of amounts or numbers.

ROLF ORIGINALS – KNIGHT'S EMPIRE

Content:

- 3 large game boards 37 × 37 cm
- 100 plastic euro coins
- 100 coloured chips
- 24 cards with knight's kit
- 16 cards with objects
- 24 cards with euro coins
- 8 large collecting cards for euro coins and the knight's kit
- 12 pawns
- 9 dice: dots 1-3 and 1-6, numbers 1-6
- 1 price tag for the knight's kit
- 2 fair maiden cards
- manual

Start counting & Counting up to 10

Using and handling various materials is an excellent way of developing arithmetical skills. 'Count to 10' gives children insight into quantities and teaches them that counting is easier when quantities are structured.

Pre-schoolers visually explore quantities and then see them increase. Each counting exercise is constructed in the same way and carried out on a large game board.

1. ROLF ORIGINALS – START COUNTING

Content:

- 4 game boards, 26,5 × 26,5 cm
- 10 quantity cards 6 × 6 cm
- 30 cards, 4,5 × 4,5 cm:
- 10 quantity cards 23,5 × 3 cm
- 20 wooden ducks
- 20 plastic bricks
- 20 wooden counters
- 20 plastic counting tops
- manual

Dottie's counting party

Counting quantities in various situations is the basis for elementary calculation. Using a variety of appealing materials, and through numerous activities, children learn to recognize and apply spatial structures in different ways. A ladybug was chosen because it has six legs and six dots. Six is a fundamental and familiar spatial structure (dice pattern). For the purpose of recognizability, all activities are introduced by a plush ladybug (to be ordered separately). "Dottie" helps children how to cleverly determine a quantity without having to count objects one by one.

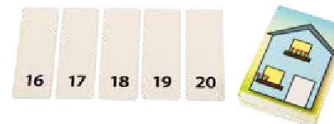

ROLF ORIGINALS - DOTTIE'S COUNTING PARTY

Content:

- 21 number cards
- 21 cards with finger images
- 12 cards with tally images
- 12 cards with red dotted ladybugs
- 23 cards with egg cartons
- 12 cards with butterflies
- 12 dice cards
- 7 cards with ladybugs without dots
- 24 cards game "Together six"
- 24 cards memory game

- 19 supplementary domino cards
- 30 domino construction cards

A row of houses

The children effortlessly and playfully explore the numbers and their symbols and places on the number line from their own perspective, the house numbers in the street. The material is very suitable for various applications and provides multiple game options with numbers between 0 and 20.

ROLF ESSENTIALS - A ROW OF HOUSES

Content:

- 20 plastic cards with houses
- 20 transparent cards with the numbers 1 - 20
- 3 plastic strips, forming a street
- 1 die with the numbers 1-20
- 2 dice with dots 1 - 5
- manual
- **Artnr. 299.0013**

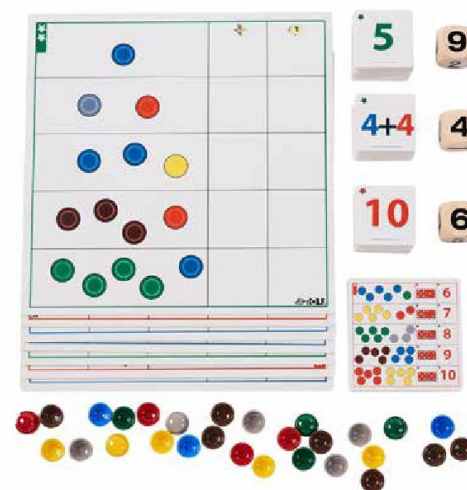

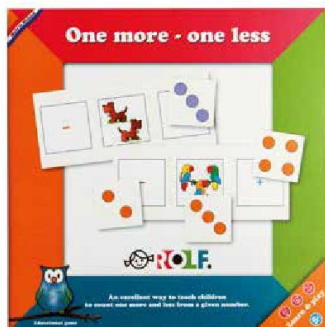

One more – one less

By repeatedly adding or removing an object the child will realize that this results in having one more one less. Take four instruction cards of the same colour, with the same quantity in the middle of each card. On the right side the child has to place a card containing one more and on the left side a card containing one less.

ROLF BASICS – ONE MORE-ONE LESS

- Content:**
- 12 large instruction cards
 - 36 small cards
 - manual
- Artnr. 299.5003

BESTSELLER

Count to 20

'Count to 20' is developed for children who are already proficient at counting and can link numbers to quantities. With 'Count to 20' quantities up to 20 are explored and counted in various ways. This helps to further develop the concept of numbers. Children learn to compare, arrange and structure (make groups of) quantities so that counting becomes easier. The children can check their exercises using the self-verification cards. Children who still experience quantities and structures as difficult, can complete the game board with the aid of the self-verification card. This way they discover how the system works as they use it and, once they have got the hang of it, they can try to complete the game boards first and then check what they have done using the self-verification cards afterwards.

ROLF ORIGINALS – COUNT TO 20

- Content:**
- 7 game boards, 26.5 × 26.5 cm
 - 70 cards, 5 × 5 cm:
 - 2 × 10 cards with numbers 1-10
 - 15 cards with numbers 6-20
 - 25 cards with dice structure
 - 10 cards with addition sums
 - 7 self-verification cards
 - 3 dice
 - 360 stacking tops in 6 different colours
 - manual
- Artnr. 230.3621

Frog jumps numbers

In developing the understanding of numbers, 3 factors play a major part: 1. counting, 2. giving meaning to numbers, 3. linking numbers to symbols (learning the figures, reading and writing figures, insight into the structure of numbers and learning the calculation signs).

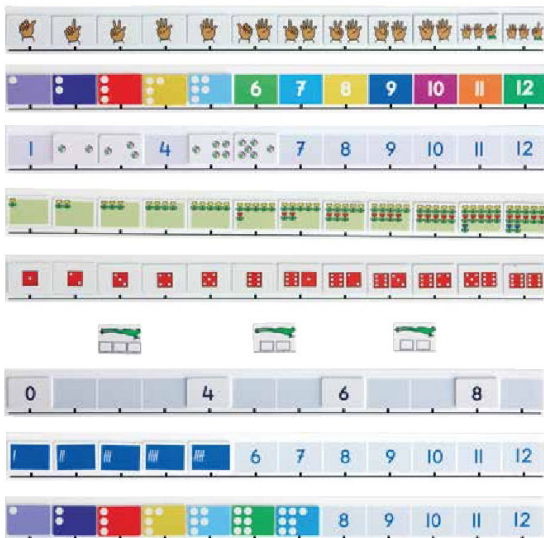

'Frog jumps numbers' playfully helps children develop their sense of numbers. This is done in different ways and with different lines of numbers. Children learn to recognize and name numbers, discover which number is higher or lower and which place a number has in the line of numbers.

ROLF ORIGINALS – FROG JUMPS NUMBERS

Content:

- 2 empty, flexible number lines
- 2 flexible number lines with numbers
- 1 flexible number line with coloured squares
- 3 number lines with 3 boxes 16 × 5,5 cm
- 3 number lines with 5 boxes 27 × 5,5 cm
- Several cards 5 × 3,5 cm:
 - 2 × 13 number cards 0–12
 - 13 dice cards 0–12
 - 13 flower cards 0–12

Coding arrows

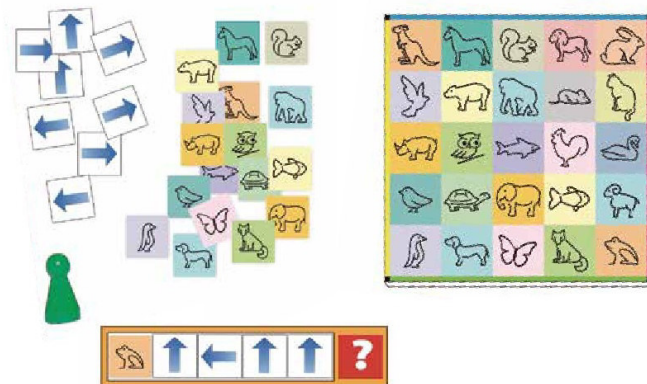

Teach the children to code with this game. Nowadays kids can start coding before they can read! But sitting in front of a computer for hours is not the best way for them to learn. That's why these unplugged materials are ideal for early learners. The principles for programming become clear and real. One of the basics for programming is robot language. And to program a robot, children have to understand the language of arrows. The children learn how to use directions to navigate.

1. ROLF ORIGINALS – CODING ARROWS

Content:

- birch wooden box 265 × 180 × 55
- 9 task strips 210 × 50 mm
- 36 cards with arrow(s) 50 × 25 mm
- 3 cards for self-verification 100 × 120 mm
- manual

Artnr. 245.0001

Coding in steps

Now children know the meaning of an arrow, they learn to turn every step on the game board into an arrow. Game: choose an animal on the board, put 4 steps on the game board and look for which animal you stop. Take that card and hide it. Encode your steps and give your code to your fellow player. He or she converts the code into steps and arrives on ...? If the code has been correctly executed, he arrives on the same animals as you did. Show him your card.

1. ROLF ORIGINALS – CODING IN STEPS

Coding

The perfect combination of physical and digital gaming. Connect to a base and be surprised by the magical connection of both worlds. Connect a hub to your laptop, iPad, Chromebook or Touchscreen and you are ready to play!

With this set of blocks and Lotties help you will learn to think like a coding specialist.

1. ROLF CONNECT – CODING

- Content:**
- In a cardboard box with lid:
 - 15 blocks (4 × 4 cm)
 - 3 blocks with functions
 - 4 blocks with directions
 - 3 blocks with the colours pink, green and orange
 - 5 blocks with actions
 - manual
- Artnr. 299.0006

2. ROLF CONNECT – HUB

The gateway to digital games

- Content:**
- In a cardboard box with lid:
 - Hub
 - Micro USB cable
 - manual
- Artnr. 799.9970

available in
AppStore & Google play

Color and shape

Discover a world full of colours and shapes together with Lottie.

1. ROLF CONNECT – COLOUR AND SHAPE

Content:

- 18 blocks
- 9 blocks with forms: circle, triangle, square, oval, pentagon, rectangle, hexagon and quadrant
- 7 blocks with colours: white, red, yellow, blue, purple, green and orange
- 2 spare blocks
- manual

Artnr. 299.0003

Two mirror-image snakes

This is how you measure the snake

This is the length of the snake

Measure pleasure with snakes

A fun group activity which playfully brings children in contact with measurement and geometry. The snakes can be put together in a wide variety of lengths, shapes and colours. Questions spontaneously arise when laying out a snake: how long is it? Which snake is the longest? What is equally long? Which one consists of more pieces, and does this also make it longer? Apart from measuring exercises, it is also possible to make mirror-image snakes or series of colours, also in combination with lengths. Do two snakes with the same colour pattern have the same length? 'Measure pleasure with snakes' offers many possibilities and fun challenges.

ROLF ORIGINALS – MEASURE PLEASURE WITH SNAKES

Content:

- 4 × 18 wooden pieces in 4 colours
- 1 measuring tape of 1 metre
- 4 laces of 1 metre
- 8 coloured clothes pegs
- manual

Artnr. 230.3631

Balances & weighing

1-4. Playing with the scales is fun and educational. It gives children insight into concepts such as more, less, as much as, light, heavy, as heavy as, upwards and downwards.

Children can use all sorts of materials to weigh, but the set of weights makes it 'real'.

5. The blue cylinders are filled with various items of increasing weight, so that concepts such as light-lighter-lightest can be discussed. With two identical sets of cylinders, concepts such as equally heavy can be discussed.

Rank the items

Develop seriation abilities by using concepts, in order to enhance conceptual knowledge. The concepts short-long, wide-narrow, full-empty and small-large have been visualized in two different ways. The children take an assignment card and three corresponding small cards. They will have to combine the identical order with the image of the abstract order. With self-verification.

1. **ROLF BASICS - RANK THE ITEMS**
- 8 series with 3 cards
- manual
Artnr. 299.5002

Sink or float

Does a paper clip float? Does a brick sink? Let the children discover! This experiment is simple science fun. Children predict about 30 objects whether they sink or float. If the child thinks that the object will sink, he or she puts the card into the box. Does the child predict that the object will float, he or she puts the card on top of the transparent lid of the box. Check together if it's correct with the solution card. Expand this game by experimenting with real objects and water.

2. **ROLF ORIGINALS - SINK OR FLOAT**
- 1 wooden box with transparent lid and slot
- 30 transparent object cards
- 1 card showing water to put in the box
- 1 card with the solution
- manual

Geometry

With this set children explore properties and relationships between the four basic shapes: square, rectangle, triangle and circle. At the beginning children stack element in panels with grooves and thereby develop motor skills and spatial visualization. At the same time they learn about shapes, sizes and colours. Elements can be sorted on the desk as instructed by the teacher or by their own ideas. Geometrical figures can be sorted in groups according to different properties. Degree of difficulty intensifies and fits to child's abilities. Children express their creativity by creating various geometrical patterns. This mathematical toy is made of solid beech wood and packed in a cardboard box.

GEOMETRY

Content:

- 8 wooden sorting panels with grooves
- 4 figures: square, rectangle, triangle and circle in three colours and three sizes, together 36 figures

Colour hunt

Each child gets a plastic collecting frame and chooses a colour card. Put the colour card in the middle or at the upper left side of the frame. The object cards are stacked on a pile and placed in the middle of the table. By turns the children take a card from the pile, they name the object and the colour of the object. The card will be given to the child that collects that colour. The first one to collect 8 cards of the same colour, wins the game. Game variation: be the first to collect 6 different colours. Game variation: just name the objects and try to remember what kind of colour they are.

1. COLOUR HUNT

Content:

- 6 plastic frames
- 6 × 8 object cards
- 6 × 1 colour cards
- manual

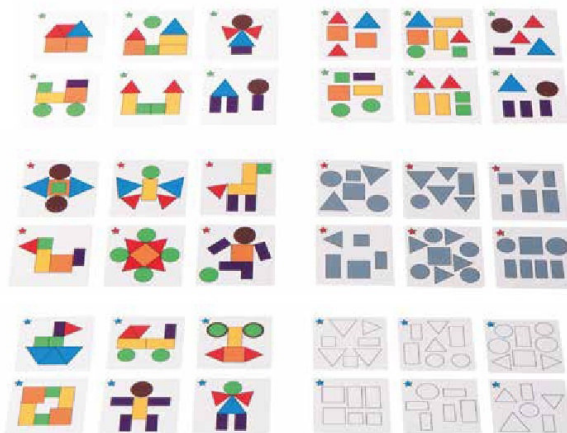

Artnr. 220.3019

2. WOODEN STORAGE BOX

Artnr. 114.4620

Duo Shape

Starting from a number of basic shapes, the child looks for a picture constructed with these shapes. We have the child analyse the pictures on the picture cards by having it find the matching shapes card. The cards are divided in series, the series are coded with a coloured star and vary in difficulty. Give the children the opportunity to design new shapes or to make model cards and reward the most original model.

ROLF ORIGINALS – DUO SHAPE

Content:

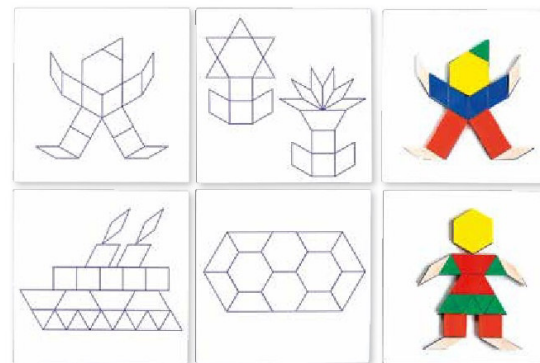

- 18 picture cards build with shapes
- 18 cards with shapes in colour, grey or outline
- 44 coloured, wooden shapes: square, triangle, rectangle, circle (large and small)
- manual

Artnr. 220.3208

ADDITIONAL SHAPES

44 pieces

Artnr. 220.3203

Geo Shapes

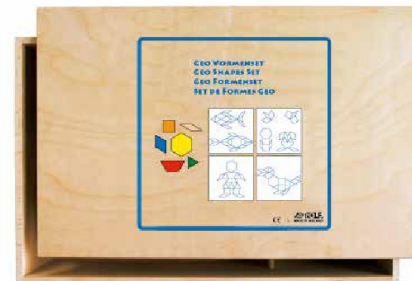

Children can produce figures independently with the "Geo Shapes Set". They can use the example cards or let their imagination run free.

ROLF ORIGINALS – GEO SHAPES

Content:

- 12 plastic example cards (24 examples)
- 250 plastic geometrical shapes: square, hexagon, triangular, trapezium
- manual

Artnr. 220.3213

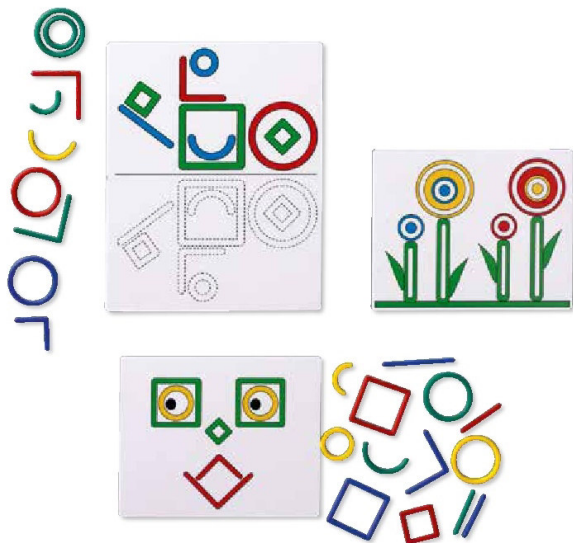

Top Form

Discover the basic shapes in a playful manner: a circle, a square, a triangle and a straight line. Different assignment cards allow you to explore the various aspects of these shapes. Use the shapes to make faces, discover the shapes that are hidden in figures, complete figures by adding the missing shapes, make the mirror image of the figures and use the shapes as a collection. This game helps children understand the different shapes and use them in their own creative combinations.

ROLF ORIGINALS - TOP FORM

4 colour kids

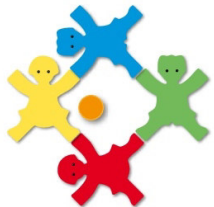

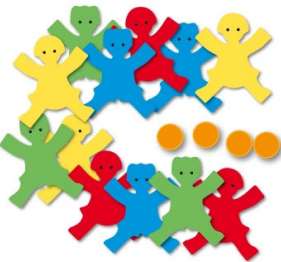

An original and exciting game that you can win if you play strategically and with a bit of luck. Start the game by putting a boy or a girl on the table. The next player places a boy or a girl on the arm or leg of the figure that is already on the table. Seize your chance and win a point if you can close the circle of 4 different coloured children with a boy or a girl in the right colour. The player who closes a circle may put one of his counters in the middle. The player who placed the most counters at the end of the game is the winner.

ROLF BASICS – 4 COLOUR KIDS

Geometric Bodies

They serve as model for better imagining and understanding of geometry. Bases of solids fit to each other. By playing with the set children learn about shapes, relations, symmetry. Children attribute relevant properties to geometric bodies by touching them. Didactic value is upgraded with matching geometric faces for better understanding of surfaces, edges and corners. Geometric solids are made of solid beech wood. Solids are 11 cm high and 7 cm diameter.

GEOMETRIC SOLIDS WITH BASES

Content:

- 6 elementary geometric solids (cube, rectangular, sphere, pyramid, cone and cylinder)
- 5 sets of faces (without sphere).

Artnr. 303.6982 / 2.001

Parts of a whole

A unique tool to teach about parts of a whole in a three-dimensional form, made of solid beech wood. By playing with the pieces, children learn about whole shapes, such as cubes, and their constituent parts like halves, quarters, eighths, etc. Highly recommended for children with special needs.

PARTS OF A WHOLE

Artnr. 303.6981 / 2.008

Trio Game

In this game we focus on the language – thinking relationship which is very closely related to the skills that play a role in reading comprehension. Arrange these cards logically in a 'cause – effect' relationship' or 'means – end' relationship. Visual observation skills are also important in this game.

Wooden letters

Children will learn letters by seeing, touching and hearing. This educational toy is meant for graphomotoric exercises as preparatory to writing. The child follows the line that actually shows the correct path of writing. The aim is to prepare children to correct writing of letters and words. Plates can be used in many ways regarding the required level of difficulty. The letters are written grammatically correctly and exactly the way children learn at school. Wooden plates are painted with ecological water-based colours. In the German sets you find all German letters, including the ones with "Umlaut". The English version is rather universal and can be used for more languages. Suitable for children from 3 years on.

Hammerplay Maxi

Children can use their imagination and create wonderful pictures by hammering shapes onto the corkboards. The shapes are extra large and made of 3 mm thick plastic. All parts from the box can also be supplied separately. Example cards can be added to the box as well.

ROLF ORIGINALS – HAMMERPLAY MAXI

Content:

- 288 shapes
- 2 corkboards 30 x 20 x 2 cm
- 2 hammers
- 1 box of nails

Hammerplay Vario

A wonderful version of Hammerplay with various figure and object shapes such as a flower, a sun, a bicycle, a sheep, a fence, a person, etc. instead of geometrical shapes. This gives children the chance to create stories using the Hammerplay Vario examples.

ROLF ORIGINALS – HAMMERPLAY VARIO

Content:

- 15 example cards, 19 × 19 cm, printed on both sides (1 side in colour, 1 with outlines)
- 2 hammers
- 1 box of tacks
- 145 plastic elements in 5 colours
- 2 corkboards 30 × 20 × 2 cm
- manual

Artnr. 220.2546

Hammerplay Geo

With this box children can hammer away to their heart's content. They can, of course, also make use of the example cards. The front sides of the cards are in colour. However, only the outlines are shown on the back sides so that the shape is given but the children can determine the colour themselves. If the example cards are used, let the children look for all the shapes first, place them on the example and then make the model. That way no parts can be forgotten.

ROLF ORIGINALS – HAMMERPLAY GEO

Content:

- 15 example cards, 19 × 19 cm, printed on both sides (1 side in colour, 1 with outlines)
- 2 hammers
- 1 box of tacks
- 144 plastic geometrical shapes in 6 colours

Super Mosaic

Not just a mosaic, but a super mosaic, with extra large pegs in eight different colours. The pegs can be fitted onto a large wall board or onto a table board as desired. Beautiful mosaics can be composed using the round and square pegs. Thanks to the excellent grip this toy is easy to play with, even for younger pre-school children. A separate storage bin can be attached to the wall board.

Eco line

To address the challenges of today's modern world and society's growing demands for more sustainable solutions, life cycle thinking is one of the major challenges faced by industries when designing products. Similarly with us. By using Green Polyethylene, we can offer unique products made from renewable resources that make a significant contribution to reducing the level of greenhouse gas emissions throughout the chain. Green Polyethylene is a renewable alternative to polyethylene. We currently offer a number of articles that comply with this, sand moulds, buckets, sieves and scoops.

Twickto Education

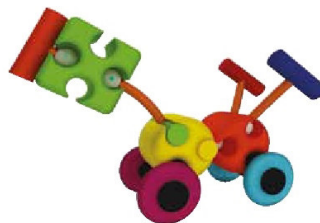

Twickto is the ultimate construction toy system for endless fun. Not only is it fun, but it also stimulates the development of talent. The Twickto building blocks are called Bricks. The Bricks are joined by parts called Twicks. You connect the Bricks and Twicks by twisting them and clicking them into place. For certain constructions, you might need a wrench to keep on building. We call it the TwickTool. Twicks, Bricks and the TwickTool: that's all you'll need. The great thing is: Twickto allows you to build anything your mind can come up with. Twickto also has an educational value besides the fun factor. It's no coincidence that Twickto is used in schools. This educational toy is excellent for a child's development. Along with other skills, Twickto teaches children to work together and to consult each other. Twickto also promotes the development of orientation skills as well as mathematical insight and spatial awareness. Twickto makes it possible for children to learn through play.

1. TWICKTO EDUCATION SET 1
368 Pieces, 2 TwickTools and
12 building cards.
Artnr. 301.3756

K'NEX®

1. MAKER KIT LARGE

This set allows up to 12 students to work together and has storage dividers for easy selection of parts. The perfect starter kit for your Maker's Space! Contains 863 pieces. This set includes a 64 page ideas booklet and can build up to 100 models.

Artnr. 301.0123 / 78497

2. INTRO TO SIMPLE MACHINES: LEVERS AND PULLEYS

Contains 178 pieces, to build 8 models. Introduce students to the scientific concepts associated with levers and pulleys. Also includes Teacher's Guide.

Artnr. 301.2471 / 78610

3. INTRO TO STRUCTURES: BRIDGES

Set includes 207 K'NEX® parts - enough to build 13 fully functioning replicas of the seven key bridge types! Students build, investigate, and evaluate scientific principles in action. Supports 2 - 3 students working as a team. Also includes Teacher's Guide.

Artnr. 301.2474 / 78640

STEM Explorations

Explore STEM concepts while building different geared models! Using the materials included in this set, elementary-school aged children will be engaged and energized as they further their knowledge and understanding of science, technology, engineering and math concepts.

1. EXPLORATION LEVERS & PULLEYS

The set includes 130+ parts for a single child or team of 2 children to build 3 unique lever or pulley models: a Balance, a Wheelbarrow and a Sailboat. Once built, a downloadable booklet guides students through 3 hands-on, inquiry-based experiments on each of the models. The Experiment Guide is aligned to national STEM standards and is appropriate for grade levels 3-5.

Artnr. 301.0129 / 79319

2. STEM EXPLORATION GEARS-

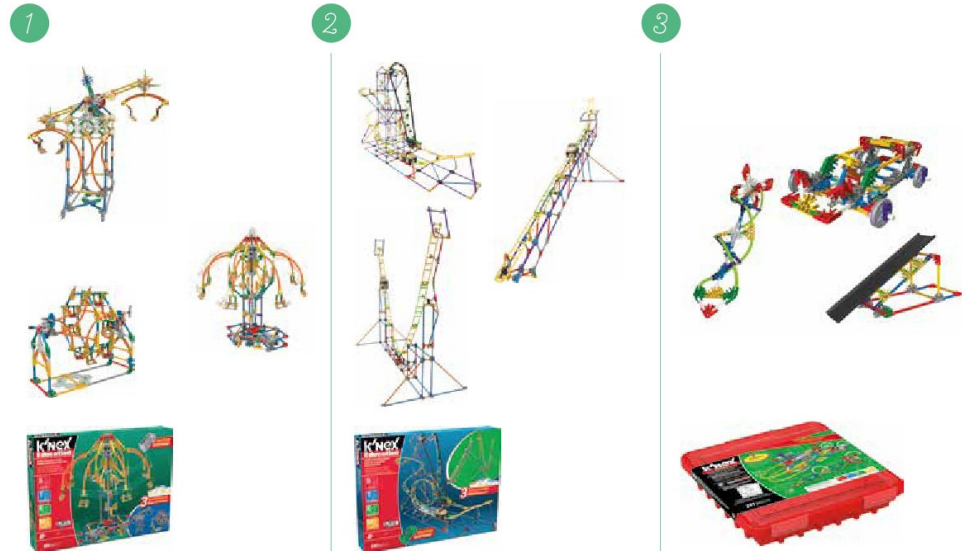

The set includes 140+ parts for a single child or team of 2 children to build 3 unique geared models: a Crank Fan, a Car Window and an Egg Beater. Once built, a downloadable booklet guides students through 3 hands-on, inquiry-based experiments on each of the models. The Experiment Guide is aligned to national STEM standards and is appropriate for grade levels 3-5.

Artnr. 301.0127 / 79318

3. STEM EXPLORATIONS VEHICLES

The set includes 130+ parts for a single child or team of 2 children to build 7 vehicle models with different power sources, including push-power, rubber band power, wind power or a spring motor. Once built, a downloadable booklet guides students through 5 hands-on, inquiry-based experiments on several of the models. The Experiment Guide is aligned to national STEM standards and is appropriate for grade levels 3-5.

Artnr. 301.0128 / 79320

STEM Explorations

K'NEX and K'NEX Education are registered trademarks of K'NEX Limited Partnership Group.

1. STEM EXPLORATIONS SWING RIDE

The set includes over 470 parts plus a battery-powered motor for a single child or team of 2-3 children to build a working Swing Ride, plus 2 additional models: a Ferris Wheel and a Boom Ride (each model can be built one at a time). The Experiment Guide is aligned to national STEM standards and is appropriate for grade levels 5-9. Requires 2 "AA" batteries, not included.

Artnr. 301.2475 / 77077

2. STEM EXPLORATION ROLLER COASTER

The set includes over 500 parts plus a battery-powered motor for a single child or team of 2-3 children to build a working Roller Coaster, plus 2 additional models: a Ramp and a Half-Pipe (each model can be built one at a time). The Experiment Guide is aligned to national STEM standards and is appropriate for grade levels 5-9. Requires 2 "AA" batteries, not included.

Artnr. 301.2476 / 77078

3. K'NEX INTRO TO SIMPLE MACHINES: WHEELS, AXLES & INCLINED PLANES

Includes 221 colorful parts to make seven different replicas of real world simple machines. Accommodates 2-3 students working as a team and appropriate for elementary classrooms in grades 3 through 5. STEM Concepts: making work easier, mechanical advantage, wedges, screws, energy transfer, mechanical systems and more.

Wall Landscapes

A giant frieze, an activity for a whole class!

Ideal for working in small groups to decorate the whole classroom, this frieze offers 28 plates in A3 format, illustrated in color, to complete on the theme of landscape (sea, countryside, forest, and mountain). It offers pedagogical support for the discovery and identification of landscapes and corresponding animals and plants, as well as shapes and colors. The children can complete it in small groups or individually. They can do this on the tables or directly on the wall according to their skill and age. This giant PlayMais® frieze makes it possible to approach artistic activities. But also language, vocabulary, discovery and understanding of the world and the environment, weather, simple and complex geometric shapes, chronology... Perfect for a classroom project or even for the whole school, it promotes collaborative work, oral expression and observation, fine motor skill and allows several avenues of exploitation over several weeks.
